

AMENDMENTS TO THE CLAIMS

This listing of claims replaces all prior versions of claims in the application.

1. (Currently Amended): A magnetic recording medium comprising a single-layered or laminated biaxially oriented laminated film and a magnetic layer disposed on one surface thereof;

at least one layer of said laminated film is a film layer C comprising an aromatic polyester (a) and a polyolefin (b) having a melting point of from 230 to 280°C, and

at least one layer of said laminated film is a film layer B comprising an aromatic polyester (a) laminated on at least one surface of said film layer C, wherein

the total number of film layers B and C are least by four,

the ratio of the polyolefin (b) is from 2 to 60% by weight based on the entire weight of the film, ~~and~~

the film thickness is from 1 to 10 μm ,

the humidity expansion coefficient in the width direction of the film is from 0.5×10^{-6} to 7×10^{-6} /%RH, and

the temperature expansion coefficient in the width direction of the film is from -8×10^{-6} to 10×10^{-6} /°C.
